2018 Color and Design Trends

Presented and Hosted by:
Ruthanne Hanlon

Presenter Bio: Ruthanne's career includes experience in kitchen and bath design, custom furnishings and space planning. Ruthanne has focused specifically on color specifications since 2000 and has consulted on commercial and residential projects along with historic restorations using the powerful influence color has in transforming a space, creating an atmosphere and providing the personalization and character everyone strives for.

Black Flame acts like a black curtain, allowing your other décor elements to take center stage. It's a fantastic blend of black and navy, two classic hues. Black creates the silence we crave in an information-heavy world, while the navy offers possibility and a deep hopefulness. The blend of two colors makes it incredibly versatile – use it on a statement wall, with a matte finish on a ceiling, with high gloss on a naturally-lit staircase, on cabinets, interior and exterior doors, and in many more places. The versatile hue can also provide strength and a modern luxe vibe to spaces with a lot of whites, blush pinks and soft pastels.

See the new collections from our four 2018 trend stories:
The Retreater, The Dream Weaver, The COMMONer, The Brave
